Windows Intune → Microsoft Intune

Microsoft Intune's historie:

- 2011 – Windows Intune bliver lanceret
- 2014 – Windows Intune bliver til Microsoft Intune
- 2019 – Microsoft Intune bliver til Endpoint Manager
- 2022 – Tilbage til Microsoft Intune

The screenshot displays the Microsoft Intune admin center interface. The left sidebar contains navigation links: Home, Dashboard, All services, Devices, Apps, Endpoint security, Reports, Users, Groups, Tenant administration, and Troubleshooting + support. The main content area is titled 'Home > Devices | Overview'. It includes a search bar and a list of options: Overview (selected), All devices, and Monitor. Below this, there are sections for 'By platform' (listing Windows, iOS/iPadOS, macOS, Android, and Chrome OS (preview)), 'Device enrollment' (with an 'Enroll devices' button), 'Provisioning' (with a 'Windows 365' button), and 'Policy'. On the right, there is a 'Preview upcoming changes to Devices and provide feedback' button. Below that, the 'Enrollment status' tab is active, showing a table of enrolled devices. The table has columns for 'Platform' and 'Devices'. The data shows 3 Windows devices, 1 Android device, 1 iOS/iPadOS device, 0 macOS devices, and 0 Windows Mobile devices, for a total of 5 devices. The last update was on 9/23/23 at 11:56 AM. At the bottom, there is a section for 'Top enrollment failures this week'.

Platform	Devices
Windows	3
Android	1
iOS/iPadOS	1
macOS	0
Windows Mobile	0
Total	5
